The Seven Steps for Effective Beaver-based Restoration

1. Consider the landscape
Find prime beaver habitat.

✓ Low gradients
✓ Wide valleys

2. Consider the beavers
Find where beavers *are* or *are not* and why.

3. Consider the People
Find where beaver/human conflicts exist.

✓ Engagement
✓ Shared goals

4. Help beavers stay
Implement coexistence solutions.

Tree wrapping

Culvert protection

5. Help beavers fix it
Repair degraded habitat.

Willow planting

Beaver dam analogues

6. Help beavers find it
Move beavers into isolated areas.

7. Monitor outcomes
Have the goals of beaver-based restoration been achieved?
